Firmware Update for old production units only.
Onkyo HT-S3910, HT-R398 and TX-SR393
(05-29-2019)

We are pleased to offer this firmware update for the best possible performance of your Onkyo Stereo Receiver **(For old production units only; See Important Note below)**

This update may be installed via USB.

(Current Version R108-0300-2120-0000) For old production units only.

Important Note: This firmware is applicable to old production units only. For new current production units, this update is not required.
Please check the serial# label on the back of the unit. If it has the letter "B" printed as shown below, then it is the current new production unit. No need to update the new production units (Version B).
Current firmware version for the new production units (B Version) is **R106-0000-2130-0000**

The 05/29/2019 update (for old production units only) will address the following and includes previous updates:

1. Supports Dolby Atmos Height Virtualizer.*
*For more detail please refer to "Listening Mode Effects" in the instruction manual and link below.
http://www.onkyo.com/manual/txsr393/supple_393.pdf

Previous Updates:

The 3/26/2019 update will address the following:

1. Add setting to switch "Standard" and "Enhanced" according to HDMI 4K signal format.

   For detail about updated function, please refer to the link below.
   http://www.onkyo.com/manual/txsr393/supple_393.pdf

2. Minor bug fixes and improvements stability.

Firmware Update Procedure:
Refer owner's manual.
